Pioneering Deeptech Solutions

GuardianEye for Logistics

From Risk to Readiness in 90 Days

The Challenge

**Logistics environments are dynamic and unforgiving.
Delays, incidents, and safety breaches don't wait.**

- Blind spots across warehouses, yards, and fleets
- Compliance pressure rising across ESG and safety
- Legacy CCTV + fragmented systems = slow response

The GuardianEye Difference

An AI agent platform built to act, not just observe.

- Detects risks in real time
- Sends alerts or triggers action via local teams
- Comes with LLM-powered dashboards and ESG tools
- Fully operational in 90 days

LIVE IN 90 DAYS

**Faster than traditional
surveillance or AI
rollouts.**

PLUG & PLAY

**Plug into existing
CCTV, IoT, and
infrastructure.**

COMPLIANCE BUILT IN

**ESG and incident
reporting dashboards
ready from Day 1.**

Discovery to Deployment in 6 Phases

PHASE	DAYS	WHAT HAPPENS
1. Discovery & Mapping	1–10	Use cases, site survey, data access
2. Data & Integration	11–25	CCTV + IoT data pipelines built
3. Custom AI Models	26–45	Agent logic trained to detect local risks
4. Dashboard Build	46–65	LLM-powered dashboards go live
5. Pilot & Training	66–80	Real-world validation & feedback
6. Scale & Handover	81–90	Full site deployment & team ownership

Where GuardianEye Delivers Value

- Forklift zone detection and collision alerts
- Gate control and freight terminal safety
- Driver behaviour monitoring and fatigue alerts
- Fire/leak detection in cold storage
- Live ESG tracking and audit documentation

Launch AI Safety in 90 Days.
